Geology Walks through Time in Shropshire

3: Silurian

Sunday 21 June, 10.30am
Wenlock Edge

This is the third of 6 geology walks visiting important geological sites in the county of Shropshire, in partnership with the Shropshire Geological Society and in celebration of CPRE's centenary year.

We will first spend time on the Lime Kiln circuit looking at the outcrops and remains of the quarrying/lime industries. There will then be time to hunt for (small) fossils at the edge of the Lea Quarry and admire the views. There will be options to return to the Much Wenlock car park on foot (around 2.5 km), or return to Presthope either via the ridge or on lower paths through the woods. The going is relatively level overall but uneven ground and short, steep steps in places. (Total walk length: around 3.5km)

Led by Mike Streetly (Shropshire Geological Society) and Sally Green (Geology Lead, CPRE Shropshire), all walks start at 10.30 and aim to be around 2 hours in length.

*How to book your place: All walks are free but places are limited. **Book via Eventbrite.** Directions, parking and further information will be sent on booking.*
